Article Type: Review

DOI:

Dear Dr Anadu,

Thank you for taking the time to submit a review about the ISN Neuroscience School meeting in Ondo. I enjoyed reading about the meeting and learning about gene-environment interactions that influence brain function and behavior. I am happy to tell you that your manuscript has been accepted for publication in Biology Open, pending our standard publication integrity checks. It was accepted on 21 Apr 2025.

Your manuscript is now with our production department, and if we require anything further from you in terms of source files, we will be in touch shortly. Otherwise, you will receive proofs in due course.

You may be eligible for free or discounted Open Access publication as part of our [Read & Publish](#) initiative (five-journal package). Participants also benefit from unlimited access to all journals published by The Company of Biologists. Find out if your institution is eligible [here](#).

Focus on biodiversity: The Forest of Biologists

For every Research Article (including Methods & Techniques articles) and peer-reviewed Review-type article (e.g. Reviews, Special Articles, Future Leader Reviews and A Year at the Forefront Reviews) published in Biology Open, a new tree will be planted in the Young People's Forest in Derbyshire, UK, in collaboration with the Woodland Trust. [Find out more](#) about The Forest of Biologists, our new biodiversity initiative.

Once your article is published in an issue, your virtual tree will appear in our [online forest](#) to represent a new tree planted on your behalf. You will receive a tweetable link to your tree shortly after publication. In addition, a new 'leaves' icon on the article will allow readers to click through to view individual trees.

Open access publication/CC-BY

Biology Open is fully Open Access; all articles are available immediately upon publication with unrestricted online access, distributed under a [CC-BY licence](#), and deposited in PMC and PubMed. Click [here](#) for more details of the licencing terms, and [here](#) to visit our Rights and Permissions page.

To cover our costs, we ask that authors of Research and Methods & Techniques papers pay a publication charge of \$1995 / £1595 / €1800* (plus VAT where applicable).

Please note that this does not apply to commissioned Review-type articles.

We ask that you complete payment as soon as possible, as publication cannot proceed until payment has been received. Full or partial waivers are available in cases of financial need, following completion of a waiver application form and approval by the Editor in Chief (to obtain a waiver form, please click on the payment link sent separately).

*Please note that the publication charge of \$1995/£1595/€1800 per article (plus VAT if applicable) will be changing to \$2200/£1760/€2000 for new submissions from 1 January 2025.

Competing interests

Note that if any author included on the manuscript has financial, personal or professional associations that could be perceived as interfering with the objectivity of their scientific judgement (see [examples](#)), they must provide a disclosure statement, which will be published at the end of the article. It is the responsibility of the corresponding author to ensure that all competing interests have been disclosed.

Accepted manuscripts online

If you selected the checkbox at submission for your accepted research paper to be posted online on our [Accepted manuscript](#) page, prior to copyediting, proofreading and typesetting, your article will be posted shortly (pending our standard publication integrity checks).

If you no longer wish your article to be posted as an Accepted manuscript, please contact bio@biologists.com within 48 hours of receiving this message.

PubMed

Please be aware that online accepted manuscripts are indexed in PubMed. It is therefore essential that the article title and abstract contain all important key words, to ensure that the article appears in the appropriate search results. To receive notifications when new papers or issues are available online, please sign up for alerts and enter your email address.

Cover image suggestions

Authors are encouraged to submit potential illustrations for the cover image displayed on the BiO website. Covers are selected by the editorial team. Cover suggestions can be emailed to the Editorial Office at: bio@biologists.com. Please include a cover caption of up to 100 words. Further information on image requirements can be found on the journal website. Please submit your cover suggestion as soon as possible and within 2 weeks of receipt of this email.

Article embargo

Your article is under embargo until it has either been posted as an Accepted manuscript or published in an online issue; should you require the embargo details for your paper, please contact bio@biologists.com.

Promoting your paper

The journal plays an active role in increasing the visibility of your paper. For more information on how to help your paper reach a wider audience, see our guidelines on [Promoting Your Paper](#).

With best wishes,

Daniel A Gorelick
Handling Editor
